

DERC PIPE BANDS

For pipe cutting applications we supply different pipe bands. The pipe bands clamp around the pipe, available in 2" increments.

- + Available in most sizes
- + Air Powered Drive Head adapts directly to the pipe band

DERC FLETRACK MAGNETIC

Flexible stainless steel track for DERC Air Powered Drive Head.

- + Comes complete with magnets
- + Works on straight and large diameters
- + Can be coupled for cutting longer lengths
- + Standard length is 1.5 m

DERC CONTROL PANEL

Control Panel for controlling the functions:

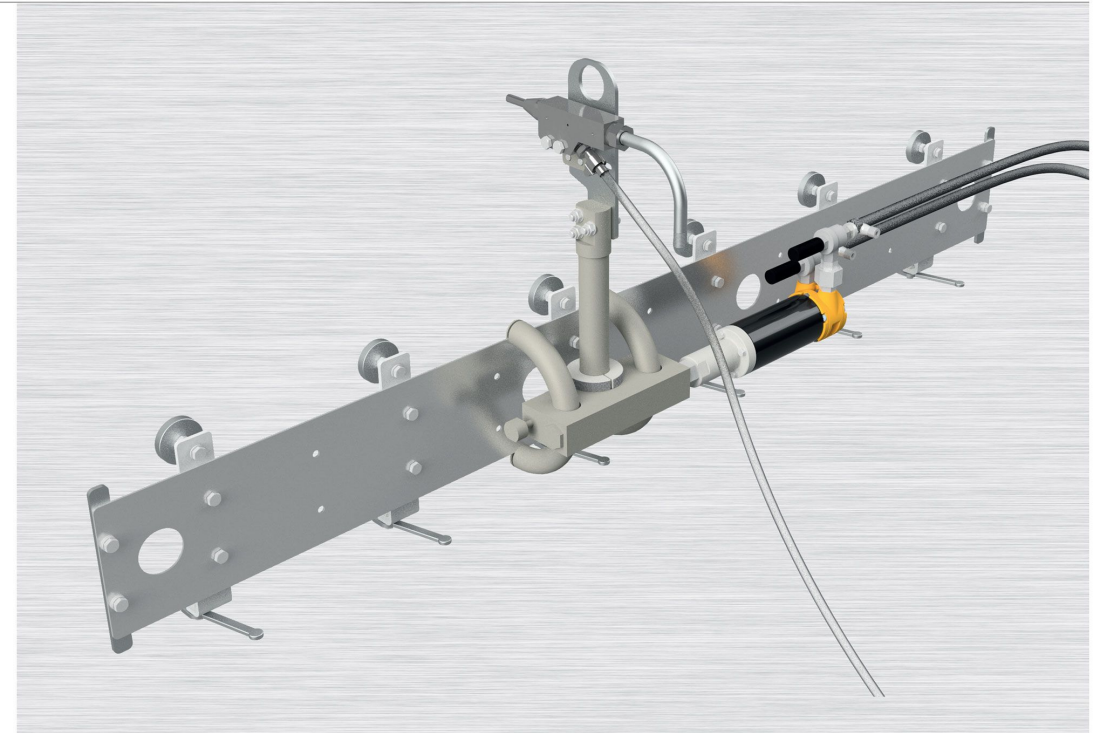

- + Power head left / right and speed
- + Abrasive feed rate / stop
- + Operator safety, due to distance

Comes complete with air hoses.

DERC AIR PREPARATION SET

Adapts to the DERC Abrasive Control Panel to ensure clean and lubricated air for an optimal performance.

- + Air filter and oiler
- + Water separator
- + Stainless steel construction

DERC Abrasive Cutting System

- + INNOVATIVE COLD CUTTING
- + SAFE AND SOUND
- + PIPE AND TANK CUTTING TASKS
- + READY FOR ANY CHALLENGE

Your solution for cutting metal safely

DERC Salotech designed and manufactured a complete line of abrasive water jetting cutting tools for industrial applications. The system is easy to use and flexible to adjust to the application. The so called "cold cutting" is the solution to all industrial tank and pipe cutting tasks. DERC Salotech has its own engineering department to design, advice and assist you with all your cutting issues.

DERC AIR POWERED DRIVE HEAD

The DERC Air Powered Drive Head moves the cutting nozzle across the surface, creating a cut at a constant rate of speed.

- + Works with both flex track and pipe band
- + Comes complete with mounting bracket for radial and perpendicular cutting
- + Height adjustment for the cutting head

CONICAL HOPPER & METERING SYSTEM

The DERC Conical Hopper with metering system is equipped with wheels for easy transport and handling on the job site.

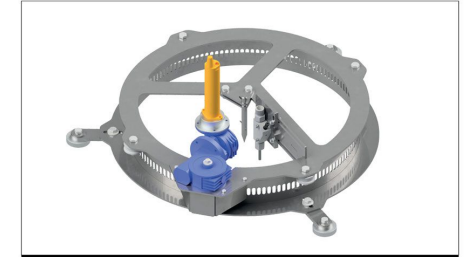

- + Stainless steel rugged construction
- + Plastic hopper with cover (50 liter capacity)
- + Abrasive adjustment screw to set amount of abrasive flow
- + Air operated on/off valve, shutting off the complete flow
- + Vent valve to add extra air
- + Sight glass to control the flow of abrasive
- + Adjustable vibrator speed to assure a constant flow of abrasive

DERC CUTTING NOZZLE

DERC Salotech provides several high pressure DERC Cutting Nozzles:

- + Model 965 M10 high pressure nozzle
- + TC cone nozzle
- + TC slurry nozzle
- + Stainless steel cutting nozzle for a max. working pressure of 3000 bar

DERC SMALL RADIUS CUTTER

The Radius Cutter for every chamfer.

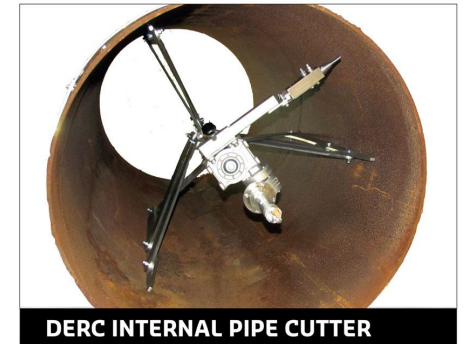

- + Diameters from DN50-DN450
- + Adjustable feet/magnets for easy mounting
- + Center point for easy setting up
- + Cutting head adjustable in all directions
- + Air or hydraulic drive

DERC MANHOLE CUTTER

DERC Salotech offers a range of manhole cutters and customized tools to encounter your cutting issue.

- + Manhole cutter from DN450-600
- + Own engineering department to design your customized tool

DERC INTERNAL PIPE CUTTER

When space or other restrictions prevent cutting from the outside, the DERC Internal Cutter is the solution to make it possible to cut the pipe from the inside.

- + Custom designed and manufactured
